
Notice Regarding the Use of Artificial Intelligence (AI) Technology

As part of our commitment to providing high-quality, efficient, and patient-centered care, Aquacare & Fitness Forum Physical Therapy may use artificial intelligence (AI)-enabled technology and other digital tools as part of our clinical and administrative workflows. These tools may include **Prompt Sidekick** and similar technologies designed to assist our healthcare professionals.

How We May Use AI

AI-enabled tools may be used to assist our team with activities such as:

- Supporting the preparation and organization of clinical documentation;
- Summarizing or organizing information related to your care;
- Improving administrative efficiency and workflow;
- Assisting with quality improvement and compliance activities; and
- Supporting other treatment and healthcare operations.
-

Your Care Remains in the Hands of Your Healthcare Provider

AI technology is intended to support—not replace—the professional judgment of your licensed healthcare provider. AI-generated or AI-assisted information is reviewed as appropriate by our healthcare professionals, who remain responsible for your evaluation, treatment decisions, clinical documentation, and plan of care.

AI technology does not independently diagnose you, prescribe treatment, or determine the medical necessity of your care.

Protecting Your Health Information

We recognize the importance of protecting the privacy and security of your health information. When AI-enabled technology is used in connection with patient information, we take reasonable and appropriate measures to safeguard that information in accordance with applicable privacy and security requirements, including the Health Insurance Portability and Accountability Act (HIPAA).

We evaluate technology used within our organization and establish appropriate privacy, security, access, and contractual safeguards when required.

Our Commitment to Responsible Use

Aquacare Physical Therapy & Fitness Forum is committed to using AI technology responsibly. AI is used as a supportive tool for our healthcare professionals and staff and is not a substitute for the professional expertise, clinical reasoning, or personal interaction that are fundamental to your care.

If you have questions or concerns regarding our use of AI-enabled technology or how your health information is used or protected, please speak with a member of our team.
