THE FUTURE.

# ABOUT US

---

Chesapeake Drilling Corporation offers a diversified range of services within the elevator industry. We operate as a full-service drilling corporation, with our specialty being in the drilling and modernization of hydraulic elevator holes.

We have the capability to drill a broad range in diameter and in all types of ground conditions and site requirements that may be encountered throughout the Eastern United States and into the Midwest. Our experienced personnel and brand offering of equipment can easily manage both rock and non-rock formations, either inside existing buildings or outside on new construction, as well as any and all phases of your modernization project.

## CDC SERVICES

---

CDC has the field representation and equipment to allow us to complete any drilling application. We have the ingenuity and experience to tackle difficult projects in various environments such as government facilities, on military bases, schools and universities, hospitals, and also various private sector projects.

No project is too large or too small for our highly skilled team. We can efficiently overcome a variety of unusual and difficult site conditions, as we have the ability and know how to work through whatever obstacles may come our way to achieve success for your project!

# EXPERIENCED TEAM

---

Our team has over 50 years of combined experience and is ready to assist with your next project.

## SPECIALIZING IN

---

- Outside Truck Mounted Drilling
