

## September 12, 2023 | STAC Subcommittee Kickoff

Attendees: Mark Nardi (Subcommittee Chair, STAC Member, USGS MD-DE-DC Water Science Center), David Krantz (Oceanographer and Coastal Geologist, University of Toledo), Meghan Noe Fellows (Director of Science and Restoration, CIB), Doug Janiec (STAC Vice Chair/Restoration Ecologist, Sovereign Consulting), Lesley Baggett (Environmental Consultant, AKRF), Taylor Krolik (EPA R3 Standards and Coordination, Delaware State Representative)

Not in attendance: Kelly Somers (EPA Region 3), Bart Wilson (Geomorphologist, FWS), Natalie Motley (EPA)

Follow Up For Orsted:

Not focusing on inlet crossing - that is a big issue.

What if they decide not to go along the road - if they come back to the Indian River route?

Have they given adequate thought to the costs/efforts of the overland route- utility conflicts?

What role/influence of the alternate non/Bays route?

US Wind Analytes:

US Wind provided parameters...

But if not taking at right depths/locations - doesn't cover the profile.

More detail of their modeling - what model they used...

Sediment Modeling Questions

Mark Nardi to follow-up

Temperature of Groundwater

Mark Nardi to follow-up

Follow-Up:

List major concerns and thought bullets to react to, in preparation for Environmental Impact Statement response. - Shared via EMAIL.

Discussion

What is final product?

Memo to Christophe re: review of environmental impact statement.

Compelling argument why important, and/or direction of how to address the concern.

Be More specific.
