

FIRE STATIONS - V-8 HYBRID XT DOUBLE BROADCAST QUARTZ SYSTEM

Get the Best product on the market

When you step onto your fire station floor after a long day, the last thing you want to worry about is the safety of your flooring. The V-8 Hybrid XT double broadcast quartz system will give you peace of mind. The color quartz in the coating creates a textured surface that helps prevent slips and falls. Similar in size to a grain of sand, these granules are colorful and come in a variety of blends to suit your preference.

Great for Outdoors!

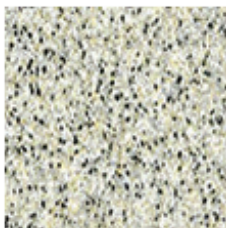

This industrial strength system is UV resistant, which means that the floor will not yellow from the sun like other coatings. It is strong and durable against the elements!
