

STAMPED CONCRETE & EXPOSED AGGREGATE - V-8 HYBRID XT CLEAR COATING SYSTEM

Rejuvenate Stamped Concrete Floors or Countertops

The pictures below are of a seven-year-old stamped concrete patio. The color had faded and worn off over the years and created an eyesore. The installers utilized the V-8 Hybrid XT clear coating to put life back into the floor by completing the following steps:

1) Water blast concrete 2) Spray on a water base color 3) Allow colorant to dry and apply 1 coat of Hybrid XT Clear

Great for Outdoors!

This industrial strength system is UV resistant, which means that the floor will not yellow from the sun like other coatings. The V-8 Hybrid XT resinous coating is one of the most durable products on the market! In fact, the chairs and grill on this patio have not scratched the floor!

Job Profile

The job turned out awesome! The V-8 Hybrid XT is an excellent clear coat solution for stamped concrete, exposed aggregate concrete, concrete countertops, and other concrete slabs. We always recommend doing a small test area to ensure a proper bond.
