Re: Letter of Recommendation

To Whom It May Concern,

I am pleased to recommend the firm of WFT Engineering, Inc. for their consulting engineering services. We are currently working with WFT on a new \$80 million headquarters facility for a Federal Government agency in Washington, DC.

WFT is in charge of the Plumbing and Fire Protection design for this building, and therefore is required to work closely with at least four of our other consultants, as well as a very challenging architectural design, to achieve a coherent final design package. Reardon Sullivan and Silvia Kabatova have been a pleasure to work with in this regard. They are quick to provide the necessary design parameters and then to respond to inevitable coordination issues, and have made themselves available for numerous meetings and phone calls. Their designs for the systems in this building and their willingness to adjust items to work within the strictures of the architectural design have made them a distinct asset to our design team.

I would not hesitate to work with them again, and am happy to receive any other inquiries regarding their level of professionalism and their attention to detail.

Regards,

Moshe Safdie and Associates, Inc
