To Whom It May Concern:

As a Project Manager in the Department of Capital Projects, University of Maryland, College Park, I have worked with WFT Engineering and in particular Martin Silver on two projects.

One project is a \$77 million high rise dormitory with an integrated 2,000 ton chiller satellite cooling facility (SCUB) serving the dormitory and other buildings on the campus. This facility was completed in April 2011. The other project, another dormitory, which also includes a SCUB as well as a substantial teaching/classroom component, is just starting construction.

Both WFT and Mr. Silver have provided us with the high quality engineering design. WFT has had special respect for the architectural issues associated with integrating the mechanical, electrical and plumbing designs with the building's architecture. WFT and Mr. Silver have been at once pragmatic and resourceful in the development of the designs.

Moreover, Mr. Silver has been remarkably diplomatic and patient with us as a client since, to be candid, we can be demanding.

It is my pleasure to recommend Martin Silver and WFT.

Very truly yours,
Project Manager
